## Accelerant SG-R 701

**Chemical Name:** Zinc Dimethyldithiocarbamate

**CAS NO.:** 137-30-4

**Product appearance :** White or pale yellowish power

### **Applications:**

It is mainly used as ultra accelerator for natural and synthetic rubbers and as general accelerator for latex. It is especially applied to butyl rubber which has request for compression deformation and the NBR (nitrile butadiene) rubber with good aging resistance, and it is also applied to EPDM. Because it is nontoxic, ordorless, non-contamination, non-discolouring, and can be applied to rubber coated fabrics, rubber product on food and medical applications. It has remarkable effect in the product of EPDM and NBR rubber etc.

**Packing:** Packed with PE bag or cardboard drum, also can be packed according to customer's requirement.

**Storage:** Seal and store it in a cool, dry and ventilated place, keep moisture-proof and waterproof, far away from kindling material and heat source.
