Accelerant SG-R 703

Chemical Name: Zinc di-n-butylthiocarbamate

CAS NO.: 136-23-2

Product appearance : Gray white power

Applications:

It is mainly used as ultra accelerator for natural and synthetic rubbers, and lattices. It is more active than ZDC in solid elastomer. The latex including this product can be used for a week without pre-vulcanization. It is excellent activator for thiazole accelerator. SG-R 703 is also antioxidant in rubber mixing. and It can improve aging resistance for vulcanized rubbers without discoloration, contamination, and gives excellent dispersion.

Packing: Packed with PE bag or cardboard drum, also can be packed according to customer's requirement.

Storage: Seal and store it in a cool, dry and ventilated place, keep moisture-proof and waterproof, far away from kindling material and heat source.
