Accelerant SG-R 706

Chemical Name: p-Benzoquinone dioxime

CAS NO.: 105-11-3

Product appearance: Gray fine crystals

Applications:

This product is mainly used as the polymerization retarder for acrylic acid, can improve the thermal resistance of the polyester fiber tire cord; It is used as the hot melt adhesive for metal and glass, and conditioning agent for the crosslinking of olefin copolymers, stabilizer for organic monomer, and adhesive for self-vulcanized products. It can activate oxidation agents (e.g., $P_{b3}O_4, P_bO_2$), and can contaminate rubber. SG-R 706 is used to fabricate the insulated layer of capsule, rubber bag, electrical wire, cable and heat resistant gasket. It is also used as adhesive for self-vulcanized products.

Packing: Packed with PE bag or cardboard drum, also can be packed according to customer's requirement.

Storage: Seal and store it in a cool, dry and ventilated place, keep moisture-proof and waterproof, far away from kindling material and heat source.
