## Titanate Coupling Agent NDZ-102

**Chemical Name:** Isopropyl dioleic(dioctylphosphate) titanate

**CAS No.:** 65345-34-8

**Product appearance :** Viscous liquid with creamy color

### **Application:**

It is mainly used in alkyd paint to decrease baking temperature, shorten baking time, which provides paint good dispersion and anti setting. As it is used in baking finish of acrylic paint, obvious effect will be seen in anti setting and antiagglomeration. It is applied to treat such inorganic materials such as calcium carbonate, barium sulfate, talcum powder etc for filling. In polymer resins including ABS, PBT etc. Such treatment can improve dispersion and adhesion for fillers in polymers, can improve flow ability in processing, enhance mechanical strength for composite materials.

**Packing:** Packed with 5L、20L、210L plastic/steel drum or 1000L IBC container, also can be packed according to customer's requirement.

**Storage:** Seal and store it in a cool, dry and ventilated place, keep moisture-proof and waterproof, far away from kindling material and heat source.
